VSI Crusher for M-Sand

Vertical shaft impact crushing | Model-dependent capacity

SREW Projects VSI installation photograph. Photograph does not establish a specific model rating.

How it works

Material enters the rotor and is accelerated into the crushing chamber. Impact and rock-on-rock attrition reduce the material for manufactured sand and aggregate production. Rotor setup, material and grading determine the result.

Published model specifications

Model	Max feed	Capacity	Motor	Weight
SREW-V500	30	30 - 40	55 kW / 75 HP	~4.2 t
SREW-V1000	30	65 - 90	75 kW / 100 HP	~4.6 t
SREW-V1200	43	80 - 140	90 kW / 125 HP	~6.4 t
SREW-V2500	45	180 - 250	187 kW / 250 HP	~9.7 t

Published price line: 30-90 TPH VSI / sand-making machine - INR 12,00,000 + GST (INR 14,16,000 including 18% GST). Higher-capacity models are price on request. The 30-90 TPH price line does not price the full 30-250 TPH family.
